

### Objectives

The aim of this program is to contribute solutions to challenges facing the world today and to bolster Japan's scientific and technological capabilities through collaboration.

### Program Setup

This program provides support for international joint research projects on the basis of equal partnership in countries, regions and fields of cooperation that have been designated as particularly important by the Ministry of Education, Culture, Sports, Science and Technology (MEXT) on the basis of intergovernmental agreements, in collaboration with funding agencies in the countries concerned.

### Project Type

<b>Consortium</b>	<p>Large-scale collaborative research in each country is carried out by the composite team.</p> <ul style="list-style-type: none"> <li>● Personnel (including young researchers)</li> <li>● Equipment</li> <li>● Full-scale experiment, etc.</li> </ul>	<p>JPY 30 – 50 million (USD 300K – 500K)</p>
<b>Acceleration</b>	<p>Acceleration of research with the corresponding foundation.</p> <ul style="list-style-type: none"> <li>● Preliminary experiment</li> <li>● Share of the experimental technique</li> <li>● Verification of data</li> <li>● Research meetings , etc.</li> </ul>	<p>JPY 5 – 10 million (USD 50K – 100K)</p>
